**Project : Bibus**

Senior Software Engineer

BIBUS AG Group is a commercial, service and manufacturing group with a presence in 20 European countries operating their own companies. It belongs to BIBUS Holding AG, a family company established in Fehraltorf, Switzerland. BIBUS AG has about 450 employees and about 30 international Subsidiaries.

The Bibus is a multi lingual, multi domain website with more than 30 domain pages with a single typo3 installation. Most of the requirements are realized through custom extensions built using Extbase and fluid methods. Document management, fair management and menu management were the major features involved

**Technology :** PHP 7, TYPO3 8 LTS, Apache Solr, HTML5, Less, CSS3, Javascript, JQuery, MySQL, GIT, Piwik

**Roles and Responsibilities:**

- Developing and maintaining websites using the typo3 content management system
- Providing technical support and guidance to clients, both during the development process and after the launch of the websites
- Conducting regular code reviews to ensure that all development work adheres to best practices and industry standards
- Troubleshooting and debugging website issues as they arise
- Developing custom typo3 extensions and integrations as needed to support the unique needs of clients' projects
- Working closely with clients to understand their requirements and implementing solutions that meet their needs effectively.

**GZO**

Software Engineer

GZO is a hospital website with responsive design and clear usability despite complex navigation. The website is developed in TYPO3 , PHP with MySQL as the database and is hosted in an Apache web server. Most of the requirements are realized through custom extensions built using Extbase and fluid methods. Department overview, Contact forms, Gift shop and baby gallery were the major features involved.

**Technology :** PHP 7, TYPO3, Mysql, JQuery

**Roles and Responsibilities:**

- Developing and maintaining websites using the typo3 content management system
- Troubleshooting and debugging website issues as they arise
- Developing custom typo3 extensions and integrations as needed to support the unique needs of clients' projects
- Working closely with clients to understand their requirements and implementing solutions that meet their needs effectively.

**PM Buddy**

Senior Software Engineer

PM Buddy is a project management tool build using Symfony and Angular

**Technology :** Symfony, Angular, Mysql

**Roles and Responsibilities:**

- Implementation of tasks with the best practices and quality standards
- Coordination with the team to achieve milestones
- Ensure the application quality by doing functional and unit testing repeatedly

**HBC Colorizer**

Software Engineer

This project involved developing an interactive web application for a paint company, designed to help users visualize how different paint colors would look on their walls. Utilizing JavaScript and HTML5 Canvas, the application provided a dynamic and user-friendly interface where customers could easily select paint colors and apply them to virtual walls within the application.

**Technology** : PHP 5, Javascript, HTML5**Roles and Responsibilities:**

- Designing, developing websites using the HTML5 & Javascript
- Troubleshooting and debugging website issues as they arise
- Working closely with clients to understand their requirements and implementing solutions that meet their needs effectively.
